All estimates/forecasts are as of 02/15/2018, unless otherwise noted.

Please see page 25 for rating definitions, important disclosures and required analyst certifications.

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report *and* investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

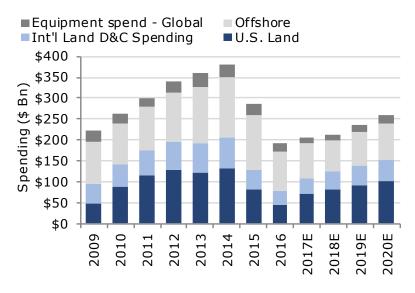

Oil Service Overview

- With WTI Near \$60, We See Upside Risk To Our Lower 48 Spending And Company
 Estimates (Which Are Based On Mid-\$50's WTI), With Select Bright Spots Internationally
- Remain Positive On OFS Sector In 2018 But See Stock Picking As Extremely Challenging As Valuations Discount "Peakish" Environment In NAM But Longer Term Growth Internationally & Offshore
- In Lower 48, Enablers Of Efficiency (Via Logistics/Scale/Technology) Likely To Gain
 Share And Better Returns As E&P Focus Shifts To Returns Versus Production Growth
- We Forecast A 5% Increase In Global Drilling & Completion Spending In 2018 Driven By A 14% Increase In U.S. Lower 48 Spending.
- Based On E&P Budget Announcements So Far, Our Bias Is That L48 Spending Could Increase Closer To 20% In 2018.
- We Forecast International Spending Down -1% In 2018 With Offshore D&C Spending Down -6% And International Land Spending +9%.
- Near To Medium-Term Offshore Outlook Remains Challenged But Massive Cost Deflation And Innovation Should Ultimately Lead To Some Recovery 2019-2020.

Macro Fundamentals Likely Support \$55-\$65 Oil Prices

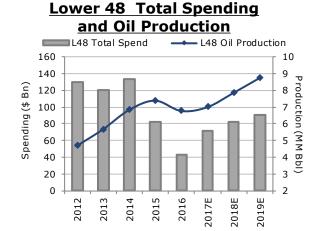

- Following An Expected 11% Recovery In Global Spending In 2017 Led By The Lower 48, We Expect Modest (+5%) Global Spending Growth In 2018
 - Driven Primarily By A Higher 2017 Exit Rate In The Lower 48
- L48 We Expect +14% In 2018 Following +67% in 2017
- Offshore We Expect A 5-7% Decline In 2018 Following A 13-15% Decline in 2017
- International Land We Expect +9% In 2018 Following +10% in 2017

Global Drilling & Completion (D&C) Spending (\$Bn)

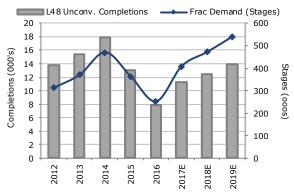

Well Productivity Starting To Normalize

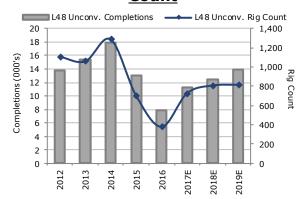

- Significantly Lower D&C Spending Likely Required For L48 Production To Exceed Prior Highs
- Higher Stage Counts & Proppant Loadings Significantly Enhance Capital Efficiency, Lowering The Required Oil Price To Drive Spending & Production Growth
- Dislocation Between Expected Stages Counts (Higher vs 2014) And Rig Count (Lower)

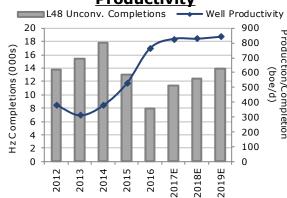

Hz Completions and Stages

Lower 48 Hz Completions and Rig Count

Hz Completions And Est. Well Productivity

Service & Well Costs To Come Into Greater Focus

- Increases In Service Costs To Be Offset By Efficiencies And Pad Drilling
- We Forecast An Approximately 17% Increase In Average Horizontal Well Costs In 2017 And A 5% Increase In 2018

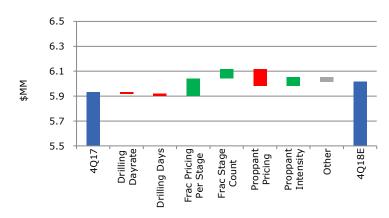

Change In Hz Well Cost - 4Q14 to 4Q17

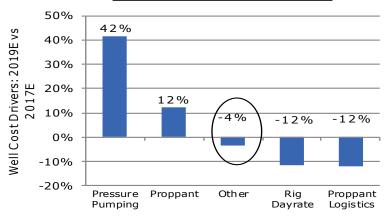

2018E D&C Spending Components

Change In Hz Well Cost - 4Q17 to 4Q18E

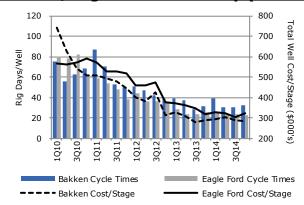

Well Cost: 2019E vs 2017E

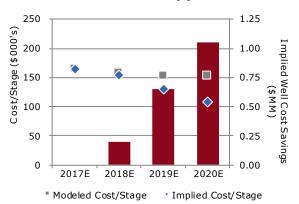

Efficiency Enablers To Gain Share In NAM

- Expect Service Cost Inflation To Be Offset By Efficiencies Primarily In Permian Basin
- Well Costs Correlate With Cycle Times; Efficiencies Could Save ~\$1 MM/Well
- Returns-Focused E&Ps To Partner With Innovative/Efficient Services Companies

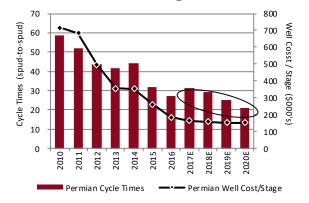

Bakken/Eagle Ford Efficiency ('10- '14)

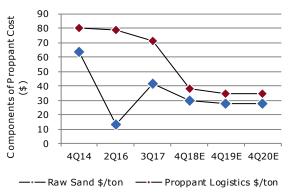

Permian Basin Proppant Cost

Permian vs. Bakken/Eagle Ford Efficiency

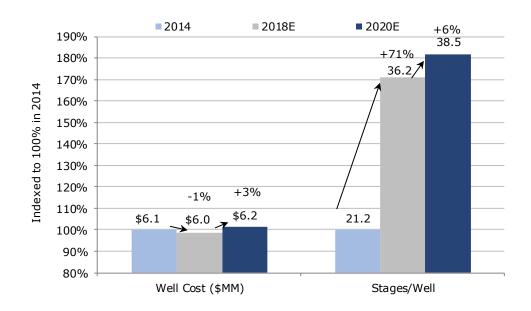

Permian Basin Proppant Cost

Doing More With Less

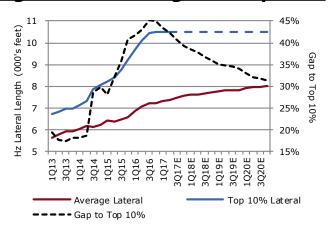

Estimated Horizontal Stage Count Vs Well Cost

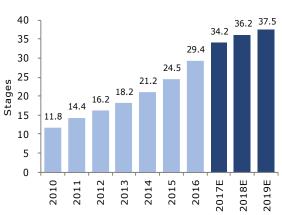

Longer Laterals Driving More Stages Per Well

- We Expect Lateral Lengths To Continue To Grow
 - Avg Hz Laterals Could Reach 8,000' By 2020 from 7,200' Currently As Top 10% Of Wells Plateau Around 10,000' And The Average Closes The Gap
- We Expect Stage Counts Per Well To Grow In Line With Lateral Lengths

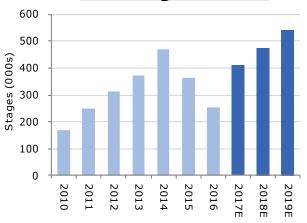

Avg Hz Lateral Length vs Top 10%

Stages Per Well

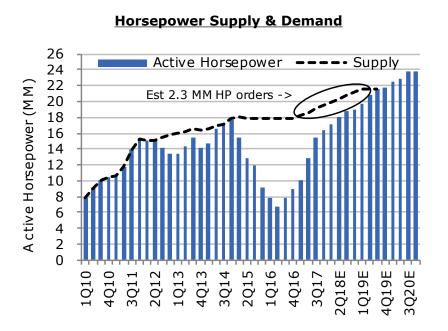

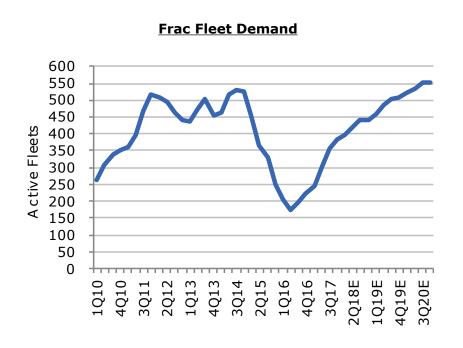

Frac Stage Demand

Frac Supply Demand Still Constructive Despite Capacity Additions

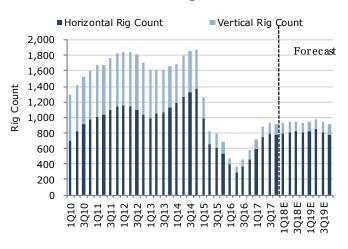

- Stage Count Forecast Suggests Continued Growth In Frac HP Demand
- Estimate About 2.3 MM HP On Order Some Of Which Replaces Attrition
- Demand Growth On Track To Match Supply Growth (Starting From Undersupply)

As of February 2018

AC Market Share - Working Rigs

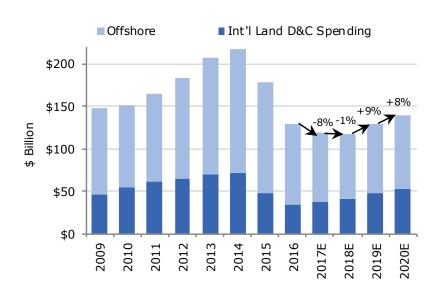

As of February 2018

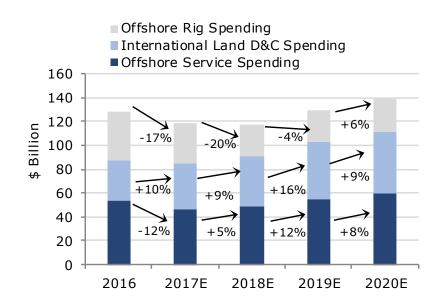

Int'l Spend Could Surprise To The Upside With \$60+ Brent Prices

 We Forecast International Spending To Decline 0-2% In 2018 With Land-Based Activity Registering Modest Increases Offset By Further Declines Offshore

International D&C Spending (\$Bn)

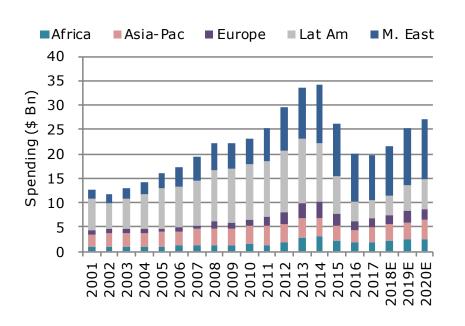

International D&C Spending Breakout

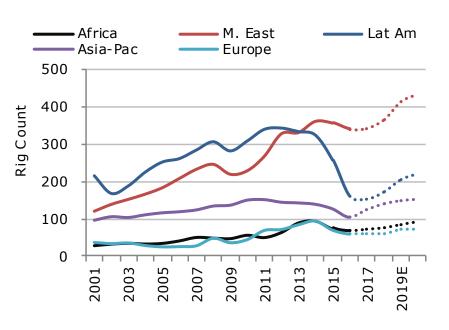

International Land Spending To Modestly Recover In 2018

International Rig Count

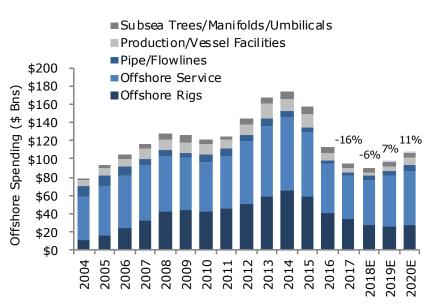

Select International Land Rig Counts

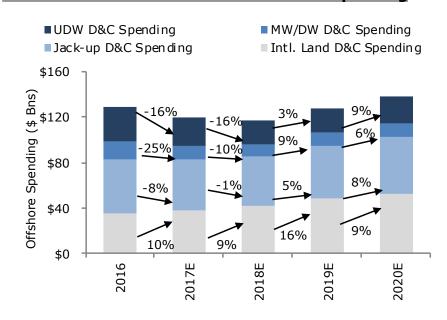

Offshore Spending Likely Set For Further Declines In 2018

- We Forecast A 6% Decline In Offshore Spending In 2018 Followed By A 7% Increase In 2019
- Re-Pricing Of Peak Contracts The Larger Driver Of Spending Reductions In 2018 Although Offset By Increases to Offshore Service Spending
- We Believe Jack-ups Troughed In 12/2016 And Floater Activity Will Trough In Mid-2018

Aggregate Offshore Spending Forecast

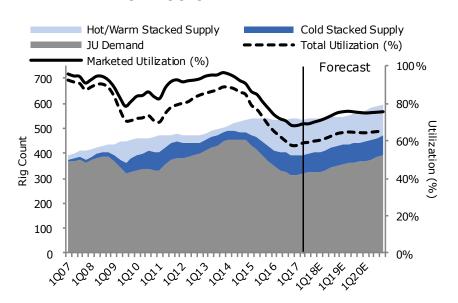

Breakdown of Est. Int'l & Offshore D&C Spending

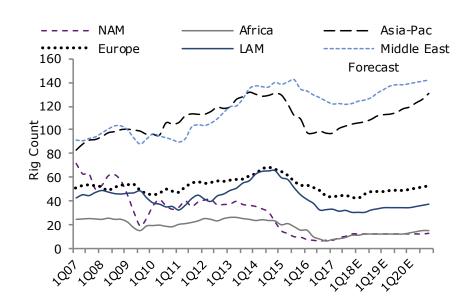

Jack-up Activity Starting To Increase

- Global Jack-up Demand Has Continued To Increase With Stronger Tender Activity
- Global Jack-up Count Troughed In 12/2016 And We Believe Will Trend Higher Over The Next Few Years With Total Utilization In The 60% Range And Effective Utilization In The Mid-70% Range
- Potential For Continued Demand Growth In The North Sea, Asia-Pacific, And Middle East Markets In 2018-2019
- We Estimate That Jack-up Attrition Of ~130 Rigs Is Likely Required Through 2020

Jack-up Supply/Demand Forecast

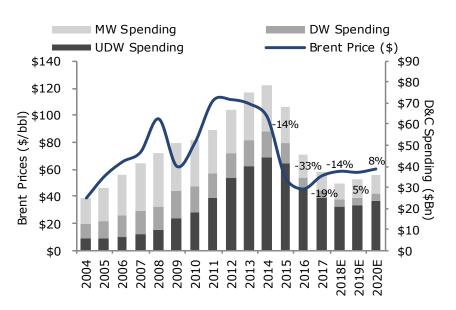

Regional Jack-up Demand

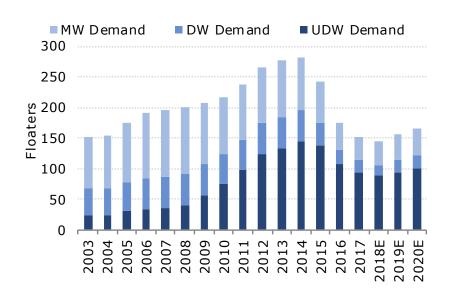

Floater Activity To Be Challenged Through 2018

- Floater-related D&C Spending Is Projected To Decline 10-15% In 2018 As Super Majors
 & National Oil Companies Continue To Right Size Their Budgets
- We Forecast The Contracted Global Floater Count To Trough In Mid-2018 At 144 Rigs And Stay Flat To Slightly Higher in 2018
- Our Base Case Assumption Is For Oil To Be In The \$55-\$65/bbl Range Which Should Drive Floater Demand Growth of 8% in 2019 and 6% in 2020

Floater D&C Spending vs. Brent

Floater Demand vs. Brent

Wells Fargo Securities, LLC does not compensate its research analysts based on specific investment banking transactions.

Wells Fargo Securities, LLC's research analysts receive compensation that is based upon and impacted by the overall profitability and revenue of the firm, which includes, but is not limited to investment banking revenue.

STOCK RATING

1=Outperform: The stock appears attractively valued, and we believe the stock's total return will exceed that of the market over the next 12 months. BUY

2=Market Perform: The stock appears appropriately valued, and we believe the stock's total return will be in line with the market over the next 12 months. HOLD

3=Underperform: The stock appears overvalued, and we believe the stock's total return will be below the market over the next 12 months. SELL

SECTOR RATING

O=Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

M=Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

U=Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

VOLATILITY RATING

V=A stock is defined as volatile if the stock price has fluctuated by +/-20% or greater in at least 8 of the past 24 months or if the analyst expects significant volatility. All IPO stocks are automatically rated volatile within the first 24 months of trading.

As of: February 15, 2018
