

Maintain Distance#1

HERE IS THE IDEA:

Promote social distancing by identifying marks on the floor where every individual should stand on

Place stickers/markings on the floor to mark the areas where individuals need to stand on (maintaining social distancing)

These markings can be placed on elevators, canteen, crowded reception areas, security entrance, etc.

HOW TO IMPLEMENT

Maintain Distance#1

- **PLACE** stickers/markings on the floor to mark the areas where individuals need to stand (considering social distance)
- **ENSURE** the distance between the stickers is not less than 2m/6ft
- **USE** foot print if practicable

Note: Ensure that the sticker/marking used does not create additional slipping hazard

COVID-19 NUDGES

HERE IS THE IDEA:

Hold the device at arm's length, double the distance is how far you should stay from people. Inform people and have posters on this tip/technique

Promote accurate social distancing using an item we always have – cellphones

Maintain Distance#2

DESIGNED BY FREEPIK

HOW TO IMPLEMENT

Maintain Distance#2

- **HOLD** your mobile at arm's length
- **ASK** from your colleague to do the same thing
- **STAND** next to your colleague

Note: Twice arm's length is how far you should stay from people
