MID-CONTINENT	TX PANHANDLE, OK, KS, NE, MO				
ROCKY MOUNTAIN	NORTH DAKOTA				
	MONTANA				
	WYOMING				
	COLORADO				
	OTHER				
WEST COAST	CALIFORNIA				
	ALASKA				
	OTHER				
EASTERN U.S.	PENNSYLVANIA				
	OHIO				
	OTHER				

Energy Workforce agreed definitions for the four categories of rig status :-

**When is a well service rig active?** By definition the rig is active if, on average, it is crewed and worked every day during the month.

**When is a well service rig available?** By definition the rig is available if a rig has a crew and is ready to work but is not working.

**When is a well service rig idle?** By definition the rig is idle if the rig is capable of being put to work in less than 48 hours and does not require spending in excess of \$50,000 to activate it, and does not have a crew currently assigned.

**When is a well service rig stacked?** By definition the rig is stacked if the rig does not have a crew assigned and could not be put to work without significant investment in repairs and additional equipment in excess of \$50,000.
